The City's Drainage Master Plan

Tuesday, November 29, 2016

6:00 to 8:00 pm

Bunker Hill City Hall

The City Council awarded a contract in January 2016 to update the City's Drainage Master Plan. The Drainage Master Plan is a technical report that compiles our previous studies and history; documents the latest severe rain events; outlines criteria and desired outcomes; and indicates areas of concern city wide. These areas of concern will in turn become potential projects for improvements over the next 10 plus years. The City's Drainage Committee has been charged with overseeing this project and has been meeting monthly to guide the process. Many thanks goes out to the Committee, all residents who have attended various meetings and shared information as well as all residents who allowed the City to survey their properties.

An Open House has been planned for **Tuesday, November 29, 2016** at City Hall **from 6:00 to 8:00 pm** to review the draft Master Plan results. Please join us and learn more about the City's plans to address drainage concerns throughout the City.
