

CITY OF BUNKER HILL VILLAGE

Wastewater Rehab Project

September - October 2016

 Denotes Wastewater Lines to be reconstructed.

The City has contracted with Horseshoe Construction to complete this work.

We are using a "burst and pull" method. It can be rather loud; however, it is only a two day process (only one "loud" day) and there are no service interruptions. They will be digging in your yard to reconnect your line to the new sewer line.

All other lines, as shown by the various colors, have been previously reconstructed. Notifications were sent to the entire area to ensure all residents in the area were aware of the project and the potential noise element.
